preparing learners for their future NOT our past™

**!deasys™**

lane clark

## thinking skills debrief 3 day workshop

### toward real learning

(prerequisite - 1 Day Overview Seminar, 'Preparing Learners For Their Future Not Our Past'  
AND 3 Day 'Thinking Skills Workshop, 'real thinking')

This one day session will provide the stepping stones for moving our learners from 'real thinking' to 'real learning'. The tools, strategies and processes associated with the 'think!nQ™' inquiry framework will be further explored and developed. This day is recommended for those who have completed the 3-Day workshop, 'real learning' and wish to move into teaching their learners how to learn in the 'real learning' Inquiry Workshop. It will also act as a support and reinforcement for 'Thinking Skills' veterans.

#### Outcomes

- assess your thinking skills literacy level
- assess your placement on the think!nQ™ inquiry continuum
- explore comprehensive integration of the arts through further guided experience with the 'Petite Inquiry' framework
- continue the development of your classroom 'ecology' through the creation of authentic shared vision and classroom culture
- experiment with new tools and strategies incorporated within the 'think!nQ™' inquiry framework as you learn how to move from 'Petite Inquiry' to a more collaborative approach to designing and delivery curriculum with your learners
