

lane clark workshop

where thinking and learning meet

Dates: Tues. 25th thru Wed. 26th October, 2011

Venue: Ibis Hotel, 18 Alma Street, Hamilton Tainui

Cost: \$450 NZ each - (Principal FREE with 4 teachers)

Times: 9am to 4.30pm each day

Lane's model for 'inquiry' learning shows teachers how to design truly powerful learning experiences that hit ALL of the key competencies in the NZ curriculum.

Jan Tinetti - Principal, Merivale Primary School

Lane's approach blends perfectly with the revised New Zealand Curriculum. Her work offers schools a powerful suite of tools and strategies to assist with school based curriculum AND instructional design.

John Petrie - Principal, Gulf Harbour Primary School

lane clark workshops

Lane's passion and excitement for learning is contagious - Christina Leef, Green Park Primary School

Where Thinking and Learning (and Inquiry) Meet

HUMAN COGNITIVE ARCHITECTURE and COGNITIVE LOAD THEORY: How can we use the latest research on the relationship between working memory and long term memory to inform our instructional design and practice?

ABOUT THINKING: Is it time to retire Bloom's theory of a taxonomy of thinking? What does it mean to think? What is the relationship between thinking and learning? How is depth and breadth of thinking developed?

ABOUT REAL LEARNING: What does 'real learning' look like and sound like? What is the relationship between 'real learning' and 'in-school learning'? How and where does inquiry fit into the 'real learning' process?

MOVING FORWARD: How do curriculum and instructional design need to change in order to prepare our learners for their future and NOT our past?

If it's our intention to increase student engagement, and foster their ability to learn how to learn for themselves; if we aim to cultivate social support and enable and empower our learners to realise high expectations - we need to re-think what we're doing, *and* how we're doing what we're doing, in our classrooms.

If we aspire to promote deep knowledge and deep understanding; if we believe in rigorous curriculum that connects to real-world contexts and is truly significant for our students - we need to change the way our classroom learning is planned, implemented, assessed and evaluated.

This workshop invites you to examine current beliefs and practice. It offers a fresh and practical approach to re-thinking and re-engineering how teachers teach and how learners learn. It brings to life the revised NZ curriculum. This is an outstanding professional development opportunity - don't miss it!

lane is available to work directly with your staff in 2011 - contact Ed for details - office@laneclark.ca
